PROFESSIONAL SUMMARY

I'm a Full Stack Developer with 3 years of experience, focusing on React and React Native. I've worked on projects that have impacted over 5,000 users and lead technical teams in government systems. I develop scalable solutions and integrate Artificial Intelligence into innovative platforms. I strive to contribute to agile teams, delivering high-value, high-performance products.

TRAINING

Computer Engineering – Potiguar University
2019 – 2023

PROFESSIONAL EXPERIENCE

FUNCITERN – State Secretariat for Labor, Housing and Social Assistance (SETHAS)
(2024 – present):

Position: Web Developer Scholarship

Responsibilities:

- Leadership in the development of web systems for SETHAS.
- Front-end development with responsive and accessible interfaces.
- Preparation of technical reports and management of the front-end team.

Projects:

Jovem Potiguar:

I led the front-end development of the pre-enrollment platform for vocational courses aimed at low-income youth. I worked on the planning and implementation of interfaces with a focus on usability and responsiveness, ensuring an efficient user experience. I coordinated interns throughout the development process and delivered a solution that has already surpassed 5,000 enrollments in two cycles (2,000 in the first and 3,000 in the second).

+ SUAS & Technical Support:

I currently lead the development of the interface for two systems focused on social assistance management in Rio Grande do Norte. **+ SUAS** is a public portal with institutional information about the system, its sub-coordinations and official publications. **Technical Support** It is an internal platform that digitizes communication between municipalities and the state, allowing for the opening and monitoring of calls with greater agility, traceability, and control of employee actions.

Techs: React.JS; Figma; Chakra UI; Docker; Gitlab; Python Django;

Lucrative Expert (2024 - present):

Position: Developer and AI implementation expert (freelance)

Responsibilities:

- Implementation of artificial intelligence for interactive chats;
- Development of AI systems and solutions;

Projects:**AI Platform for Content Creation:**

I'm contributing to the development of an artificial intelligence tool that simplifies digital content creation, offering creative suggestions, ready-made text for social media, and automatically generating visual elements such as logos, banners, and custom artwork.

Techs: React.JS; Supabase; Tailwind; Green; Stripe;
